Detailed Rationale

Crisil Ratings has continued its rating on the long-term bank facilities of Cohance Lifesciences Limited (CLL) (erstwhile Suven Pharmaceuticals Ltd (SPL)) on '**Rating Watch with Positive Implications**'; the short-term rating has been reaffirmed at 'Crisil A1+'.

Crisil Ratings had placed the long-term rating on watch positive on Feb 29th, 2024, post the announcement regarding the scheme of amalgamation of CLL into and with SPL which was subject to receipt of necessary approvals.

Crisil has taken note of the completion of the amalgamation process with the receipt of necessary approvals and the merger took effect from May 1, 2025 and the name of the combined entity has been changed to CLL.

Crisil Ratings also has noted the acquisition of 56% of share capital of NJ Bio Inc on Dec 20, 2024 for a consideration of Rs. 547.96 crores and gained control of NJ Bio Inc as a subsidiary. The amount was paid off from the cash reserves and no debt was availed for the same. The cash position stood at Rs. 282 crores as on Dec 31, 2024.

Crisil is in the process of evaluating the impact of the acquisitions and the amalgamation which is completed on the overall business and financial performance of the company. Management is in the process of sharing the requisite information sought/ meeting for the same. The ratings shall be removed from watch and a final rating action will be taken once the assessment is completed.

The ratings continue to reflect Suven group's established market position, and its strong financial profile. These strengths are partially offset by working capital intensive operations and exposure to customer concentration risk.

Analytical Approach

For arriving at the ratings, Crisil Ratings has combined the business and financial risk profiles of CLL with its subsidiaries; Suven Pharma Inc, Sapala Organics Pvt Ltd & NJ Bio Inc. This is because these companies, collectively referred to as the Suven group, have a common management team, are in similar lines of business, and have operational linkages and fungible cash flow. Crisil shall take a view on the combined entity post amalgamation post the detailed assessment.

Please refer Annexure - List of Entities Consolidated, which captures the list of entities considered and their analytical treatment of consolidation.

Key Rating Drivers & Detailed Description

Strengths:

- **Established market position:** The group has established market position in the contract research and manufacturing services (CRAMS) segment and is among the top five players in India who supply high-end intermediaries to innovators. Further, long-term contracts with the established and reputed principals also aid steady order flow. Market position has remained strong with company reporting Rs. 1051 crores of topline in fiscal 2024 and Rs. 843 crores in first half of the ongoing fiscal. Crisil Ratings expects the market position to strengthen further with the completion of amalgamation.
- **Strong financial risk profile:** Financial risk profile has remained strong with minimal reliance on external debt and healthy networth base. Networth remained strong at around Rs. 1978 crores as on Sept 30, 2024, and is estimated to be around Rs. 2200 crores by the end of the ongoing fiscal. Capital structure also continues to be strong and will continue at less than 0.05 times in the medium term. Debt protection metrics also remained robust with interest coverage of above more than 40 times and is expected to continue strong in the medium term on back of no debt funded capex in pipeline.

Weaknesses:

- **Working capital-intensive operations:** Operations remain moderately working capital intensive with estimated gross current assets (GCAs) of 180-200 days as on March 31, 2025. The higher GCA days are mainly due to the higher inventory levels of 4-5 months due to long time taken for product approvals and higher inventory maintained to cater the bulk orders from the customers.
- **Exposure to customer concentration risk:** The top five customers contribute a substantial share of the revenue, exposing the company to customer concentration risk.

Liquidity: Strong

Net cash accruals estimated to be above Rs. 300 crs in fiscal 2025 against which the company doesn't have any term debt obligations.

Liquidity is further supported by free cash and liquid investments of Rs. 282 crores as on Dec 31, 2024. These are expected to continue to increase over the medium term with significant accretion to reserves.

Rating sensitivity factors**Upward factors:**

- Significant strengthening of SPL's market position and production portfolio with the proposed amalgamation leading to net cash accrual of Rs 400 crore.
- Further strengthening of financial risk profile and liquidity.

Downward factors:

- Steep fall in revenue along with dip in operating margin resulting in lower net cash accrual of under Rs 150-200 crore.
- Higher than expected debt-funded capital expenditure along with stretch in the working capital cycle, leading to weakening of financial risk profile and liquidity
